DETAILED ACTION

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1-11 are rejected under 35 U.S.C. 103(a) as being unpatentable over Yamamoto(6466107) in view of Testuo(Epo247540).

Yamamoto substantially discloses the claim invention in fig.12b. However, Yamamoto does not disclose at least one piezoelectric layer having a thickness that is different from each of the thickness of the other piezoelectric layers.

Testuo discloses in figures 1-4 a piezoelectric element comprising: a at least 4 electrodes(41,42,61,62) and a least three piezoelectric layers(21,22,30) which includes two outer piezoelectric layers(21 and 22) and a central piezoelectric layers(30) having a thickness that is different from each of the thickness of the outer layers. Wherein, the connection electrodes(51 and 52) provided on two sides of the three piezoelectric layers and connected to the internal electrodes and the polaraization direction and the electric field direction(fig.1-4) are opposite to each other and the central piezoelectric layer(30) and the lower piezoelectric layer(22) polarazation direction and the electric field directions are identical to each other. Testuo also discloses the central piezoelectric layer inactive and at least three piezoelectric layers having a relationship express by $t_1 = t_3 \neq t_2$ and $1 < t_1/t_2 < 3$ and $1 < t_3/t_2 < 3$.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Karen B Addison whose telephone number is 703-306-5855. The examiner can normally be reached on 8:00 to 4:30.
